DETAILED ACTION

Claims 160-170 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1-11.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12 December 2005 has been entered.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
It does not identify the correct citizenship of each inventor.
Specifically, Richard Wall has the incorrect citizenship of Canada instead of United States.

Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth above. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in

Art Unit: 1626

ABANDONMENT of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to products of the formula (I). The novel and nonobvious aspect of this invention involves the group $-O-CH(R_5)-X-A$. The closest prior art of record fails to teach or suggest applicants' instant invention. The closest prior art of record is US Patent No. 5,637,583 which discloses compounds for the treatment of arrhythmias of the formula I which differs from the instantly claimed compounds by the position equivalent to applicants' $-O-C(R_5)-X-A$ (wherein R_5 is independently selected from hydrogen, C1-6alkyl, aryl and benzyl) wherein in US Patent No. 5,637,583, the compound of formula I must have $-O-C(=O)XA$ which contains a carbonyl group which is not a possible substituent on applicants' instantly claimed products of the formula (I).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
